

Wales Route 2: Full Time Education (16-19)

BEFORE YOU START

- 1) This route includes ongoing employer involvement which will be arranged by your training provider, for instance work experience placements.
- 2) Depending on your entry grades you'll start at either Level 1 or Level 2. If you don't become employed and move onto an apprenticeship, you can progress to Level 3.
- 3) Each technical qualification takes around a year to complete; to complete the full process to qualified electrician stage will take around 4 years.

FE-BASED QUALIFICATIONS

Level 1 Diploma in Electrical Installations - City & Guilds or EAL

EAL Progression in Building Services Engineering (Level 2)

Level 3 Diploma in Electrical Installations - City & Guilds or EAL

(subject to availability due to sector reform)

IF YOU WANT TO PROGRESS AND TRAIN ANY FURTHER YOU'LL NEED TO BE WORKING IN THE INDUSTRY IN ORDER TO BECOME A QUALIFIED ELECTRICIAN.

If you secure employment and your employer agrees to support your apprenticeship:

APPRENTICESHIP

If you become employed and transfer onto an apprenticeship programme, your existing knowledge and experience may reduce the time you'll need to spend to complete your training. See Route 1 for details on the Apprenticeship and AM2 journey.

ASSESSMENT OF COMPETENCE

To achieve your qualification, you'll need to take the industry assessment of competence, the AM2, which tests everything you've learnt during your training.

QUALIFIED ELECTRICIAN

Once you've completed the Apprenticeship, you'll be a qualified electrician.
